Subject: USEPA Holy Trinity Cemetery
Date: Friday, August 21, 2015 2:20:00 PM
Attachments: RADON - Holy Trinity Roman Catholic Church - 5401 Roberts Ave., Lewiston NY.pdf
Importance: High

Good Afternoon:

Attached are the preliminary radon results for the Holy Trinity Cemetery Building. This is draft preliminary information and there will be polished diagrams in the final report. As expected, there are no increased radon readings in your building (4.0 pCi/L is the action level).

As our draft data products are developed, we will submit them to you for your review. I will contact Ex. 7(c) and request a fax number to pass on reports.

Regards,

Eric

Site Radon Inspection Report

Date : 08/18/2015

The reported results indicate that radon levels in the building are below the United States Environmental Protection Agency (EPA) action level of 4.0 picoCuries per liter of air (pCi/L). The EPA recommends retesting if your living patterns change and you begin occupying a lower level of the building, such as a basement or if major remodeling is done.

General radon information may be obtained by consulting the EPA booklet: A Citizen's Guide to Radon (www.epa.gov/radon/pubs/citguide.html). To request a copy or for further information, please contact your state health department. The EPA maintains a radon information website, including copies of its publications, at www.epa.gov/iaq/radon.

For New Jersey clients: Please see the attached guidance document entitled Radon Testing and Mitigation: The Basics for further information.

For New York clients: If the radon level of one or more testing devices is equal to or exceeds 20 pCi/L please contact the New York State Department of Health, Bureau of Environmental Radiation Protection, for technical advice and assistance at 518-402-7556 or toll free 1-800-458-1158.

PLEDGE OF ASSURED QUALITY

All procedures used for generating this report are in complete accordance with the current EPA protocols for the analysis of radon in air (EPA 402-R-92-004). The analytical results relate only to the samples tested, in the condition received by the lab, and that calculations were based upon the information supplied by client. RTCA and its personnel do not assume responsibility or liability, collectively and individually, for analysis results when detectors have been improperly handled or placed by the consumer, nor does RTCA and its personnel accept responsibility for any financial or health consequences of subsequent action or lack of action, taken by the customer or its consultants based on RTCA-provided results.
